PROFESSIONAL SUMMARY

A Computer Science undergraduate at SLIIT who picks up new technologies fast, applies them with intent, and consistently delivers work that goes beyond the brief. Academically strong across core CS disciplines from algorithms and data structures through to compiler theory and software architecture and equally comfortable translating that foundation into working, production-quality software. Having built full-stack web platforms, and contributed as a recognized leader within IEEE, all while maintaining a demanding academic schedule. Brings a methodical engineering mindset balanced with the creativity to solve problems that do not come with a textbook answer. A natural team contributor who communicates clearly, adapts quickly, and takes responsibility seriously. Looking for a software engineering internship where the bar is high and the opportunity to learn from experienced engineers is real.

EDUCATION

BSc (Hons) Computer Science

SLIIT University, Sri Lanka | 2023 – Present

TECHNICAL SKILLS

Languages: Java, C, C#, Python, JavaScript, HTML5, CSS3, SQL, Bash Frameworks: Spring Boot, React (Vite / React 19), .NET, JUnit 5 AI / ML: NumPy, Pandas, Matplotlib, Jupyter Notebook Databases: MySQL, Microsoft SQL Server (SSMS) Testing: Unit Testing, Integration Testing, JUnit 5, Manual API Testing via Postman	Tools & DevOps: Git, GitHub, Maven, Postman, Java HttpClient, Linux CLI, Docker, GitHub Actions, Azure App Service, Jira Concepts: OOP, Data Structures & Algorithms, REST APIs, MVC / Design Patterns, Compiler Design, SDLC, Agile / Scrum, CI/CD, Clean Architecture, CQRS UI / UX: Figma, Canva, Wireframing, Responsive Design principles IDEs & Editors: IntelliJ IDEA, Visual Studio Code, Visual Studio, Eclipse
--	---

PROJECTS

Cloth Haven – Full-Stack E-Commerce Platform

Tech: Java, Spring Boot, React 19, MySQL

Designed and built an end-to-end clothing retail web application from the ground up, covering everything from database schema design to frontend UI. The Spring Boot backend exposes a clean RESTful API following a Controller-Service-Repository layered architecture, with JWT-based authentication securing user sessions.

github.com/kaveen20030408/Cloth-Haven

HTTP-TestDSL – Declarative API Testing Compiler

Tech: Java, JFlex, CUP, JUnit 5, Java HttpClient, Spring Boot, Maven

Built a domain-specific language for declarative backend API testing, reducing boilerplate test code. Implemented the compiler pipeline using JFlex and CUP, including tokenization, parsing, AST construction, semantic validation, and runtime execution. The tool sends real HTTP requests using Java HttpClient and validates responses through JUnit 5 tests.

Fluxion – Enterprise Asset & Maintenance Management System

Tech: React.js, .NET Web API (C#), MySQL, Entity Framework Core, JWT, Docker, Azure App Service, GitHub Actions

Designed and built a full-stack Enterprise Asset & Maintenance Management System covering database schema design, backend architecture, and frontend UI. The .NET Web API backend follows Clean Architecture, with JWT authentication and role-based access control across Admin, Manager, and Technician roles.

github.com/kaveen20030408/Fluxion

TaskFlow – Spring Boot Backend Testing

Tech: JUnit 5, MockMvc, Spring Boot Test, Maven

Authored 36 test cases across 7 test files for a Spring Boot backend, validating HTTP response contracts, JWT authentication, input validation, and global exception handling using JUnit 5, Spring Boot Test, and MockMvc.

github.com/kaveen20030408/TaskFlow

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Leadership & Coordination
- Communication
- Adaptability
- Time Management

EXTRACURRICULAR ACTIVITIES

- **Project Coordinator – IEEE StudPro, SLIIT Student Branch:** Oversaw project planning, cross-team coordination, and timely delivery of student-led technology initiatives within the IEEE ecosystem.
- **Volunteer Member – IEEE Student Branch of SLIIT:** Actively participated in technical workshops, industry seminars, and community outreach events, broadening both professional network and technical exposure.
- **Member – Microsoft Student Club at SLIIT:** Engaged in hands-on technical workshops and collaborative peer learning sessions focused on Microsoft technologies and modern development tools.

CERTIFICATIONS & TRAINING

- **AI/ML Engineer Stage 1** – Centre for Open and Distance Education, Faculty of Computing, SLIIT.
- **AI/ML Engineer Stage 2** – Centre for Open and Distance Education, Faculty of Computing, SLIIT (ongoing, 2026).
- **IEEE StudPro Leadership Training** – IEEE Sri Lanka Section.
